

Massachusetts EMT Renewal and Transition to NREMT Educational Requirements

Along with or in addition to the National Core Competency Requirements NCCR 20 hour class, recertifying EMT’s will need to complete the additional educational requirements in two separate categories: Local Continued Competencies (LCCR) and Individual Continued Competencies (ICCR).

Our continuing education line-up follows the NREMT and DPH/OEMS recommended topics for both categories: LCCR and ICCR.

The requirements for each category are 10 hours each or 20 hours total.

These newly named Con-Ed programs can be implemented in any of the following formats:

* In class or online

- Our exclusive ONLINE INTERACTIVE* course’s do not take away or use your 13 hours of online credits.

* 10 hours of ONLINE (uses online credits)

The *individually bundled* courses will cover all requirements with a total of 10 hours in each category.

Keep in mind that a total of 13 hours or one third of your education in a recertification period can be taken online unless the course is interactive.

Our INTERACTIVE component requires you to complete the specific topic (s) during a period of time in which you may communication with a faculty member in “Real-Time” if needed. A schedule of available faculty interaction will accompany your course.

You decide how many online credits you desire to use and/or what time frame to use the interactive option.

We look forward to assisting you through the recertification process and making the transition as easy as possible.
