**Junior
Wilderness Technician**

Junior Wilderness Technician is a specialized course to teach our children some of the most important lessons of life. Our goal is clear. We wish to have the chance to give children a gift, a gift of skills and awareness, and to allow our children to experience some of the deeper things in life. We would like to lead them back to the earth, back to pure awareness, to adventure and to the awesome rapture of living alone with providing them with the tools necessary to ascertain purpose with-in themselves. By teaching nature, survival, and awareness, we hope to open children up to a life full of wonder, not crime.

The Program

The Junior Wilderness Technician program is an appropriate, safe, & fun filled experience for each camper. Camp sessions

are held on pre-scheduled dates and most generally run from 6pm - 9 pm one weekday (usually Weds.) and from 8:30am - 4pm Saturday.

* Each session is divided into a well structured, fun filled day. Each camper will be assigned a camp counselor/instructor for the entire duration of camp.

Camp Orientation:
Pre camp meeting for parents: held at least one week prior to camp, date and time TBA.

Camp sessions are filled on a first come first serve basis. A parent packet including a health form, authorization for pick-up, and other pertinent info will be given at registration time or sent by mail

This program is sponsored by the Massachusetts Emergency Care Training Agency, MECTA, Inc.™, and it's supporters.

“Children are the future, and without children rooted to the earth, there can be no future” T. Brown Jr.
